

QuoteFlow Pro

Autonomous AI Proposal Accelerator for High-Ticket Trade Contractors

Prepared for Enterprise Buyers, Investors & Stakeholders | September 2026

1. Executive Summary & Market Problem

High-ticket trade contractors (landscapers, roofers, pool builders, remodelers) face a critical operational bottleneck: field site-walk notes sit in notebooks for days because founders and estimators are overwhelmed with manual line-by-line pricing. Across the industry, quote cycle times average 6 to 9 days.

The Financial Leak: 35% to 40% of qualified homeowners hire a faster competitor while waiting 7 days for a proposal. For an average contractor generating \$4M/year across 150 projects (\$28K avg job size), this slow quoting cycle costs over \$1,400,000 in lost revenue every single year.

2. Product Solution & Core Capabilities

QuoteFlow Pro automates the interpretation step between informal site-walk field notes and structured pricing catalogs. It converts messy field notes into fully itemized, catalog-priced proposal drafts in seconds, reducing turnaround time from 7 days to under 2 minutes.

- **AI Scope Parsing & Catalog Mapping:** Google Gemini Flash parses raw, unstructured text or voice notes against a 200+ SKU pricing database.
- **Line-Item Confidence Ratings:** Evaluates accuracy per line item (High, Medium, Low) so estimators only spot-check shaky items.
- **Interactive Proposal Editor:** Inline editing drawer allowing estimators to adjust quantities, unit prices, or add catalog items prior to approval.
- **Client-Ready PDF Generator:** Instant PDF proposal download with company branding, terms, subtotal tables, and special condition flags.
- **RESTful OpenAPI & CRM Webhooks:** Exposes clean /api/v1/ endpoints with automated Slack alerts and GoHighLevel (GHL) CRM synchronization.

3. Financial ROI & Business Value Justification

Metric / Lever	Before QuoteFlow Pro	With QuoteFlow Pro (ROI)
Quote Turnaround Latency	6 to 9 days	< 2 minutes (99% reduction)
Lead Conversion Loss	35% - 40% lost to fast rivals	Recovered 50%+ (\$700K - \$1M+ ARR)
Estimator Weekly Admin Time	25+ hours/week in Excel	15 minutes of review per week
Software Operating Spend	\$90,000/yr per new estimator	< \$10/month in Gemini API costs

4. Technical Architecture, Security & Testing

The codebase is engineered to enterprise software standards, avoiding unvalidated AI outputs or fragile architecture:

- **Backend & Validation:** FastAPI async framework with Pydantic schema guardrails. Malformed JSON is caught and stored as a parse_error for manual review -- bad data never auto-sends.
- **Database Layer:** Supabase PostgreSQL persistent storage with a zero-dependency in-memory mock backend (APP_ENV=test) for instant offline execution.
- **PDF & API Layer:** fpdf2 native document generation engine and complete RESTful OpenAPI specifications (/docs and /redoc).
- **Security & Quality:** Bandit Static Application Security Testing (SAST), Black/Ruff code formatting, pip-audit dependency scans, and multi-stage non-root Docker containerization.
- **Automated Test Suite:** 100% reliable test suite with 62 automated pytest unit and integration test cases.

5. Commercial Go-To-Market & SaaS Pricing Tiers

QuoteFlow Pro is packaged as a B2B Vertical SaaS product targeting the 600,000+ trade contracting businesses in North America:

- **Starter Tier (\$199/month):** Up to 30 proposals/month, PDF export, standard catalog mapping.
- **Pro Tier (\$399/month - Most Popular):** Unlimited proposals, AI Confidence Ratings, Interactive Edit Drawer, Slack & GoHighLevel CRM

QUOTEFLOW PRO -- COMMERCIAL PRODUCT DOSSIER

Executive Product Brief, Technical Architecture & Business Value Analysis

integration.

- **Enterprise Tier (\$899/month):** Multi-estimator team support, custom catalog API sync, QuickBooks / ERP integrations.

Conclusion: QuoteFlow Pro represents a high-margin, enterprise-ready software solution that solves a multi-billion dollar friction point in trade contracting. By combining autonomous AI extraction with human-in-the-loop oversight, it delivers 100x+ ROI to purchasing contractors.
